**RE: Hazardous Materials Underground Storage
Closure / Site Assessment / Remediation Reports
Closure Permits 6327B and 61098
UPRR Preston Weed Control Lease Property
12300 Whittier Boulevard, Whittier, California**

Dear Ms. Iyer:

To follow up our phone conversation of May 16, 1995 during which we discussed the current status of the Preston Weed Control Property, I am providing your office with data as specified in your December 7, 1993 letter request. Not all of your requests can be met; however, we have provided explanations for the missing items and are confident cost effective resolutions can be reached. All figures and tables for this letter report are included in "Figures" and "Tables" sections at the end of the report. Your requests for information are shown in italics.

1. *Plan and cross-section of the excavation showing all the sampling points and sampling depths (including samples/borings of previous site assessments) for areas 5, 6, 7, and 13 (relating to the four sumps, in the garage area, and underground storage tanks).*

Presented in the "Figures" section are two site plans encompassing the areas 5, 6, 7, and 13 relating to the four vaults in the garage area and the underground storage tank. The first site plan, Figure 1, shows the site and all the sample points used to characterize the site prior to remediation. Table 1 summarizes the analytical results of those samples and the laboratory data sheets are presented in Attachment A. The second site plan, Figure 2, shows the extent and depth of the remedial excavation(s) and the location of all verification samples collected. The analytical results of these samples are presented in Table 2, and copies of the laboratory analytical data sheets are presented in Attachment B. The two cross sections through the excavation are labeled Figure 3 and Figure 4. The sections incorporate all data collected along each section line during the characterization and remediation process of the site.

2. *Verify if any piping was associated with the underground storage tank. Sampling was required below the piping per Closure Permit 6372B.*

The underground storage tank, shown in Figures 1 and 2, was a 500 gallon gasoline tank. The tank was used by Preston Weed Control to fuel their delivery trucks. The piping associated with the tank consisted of a vent pipe, a fill pipe, and a hand-operated product distribution pipe. All piping was located immediately above the tank and was removed during the tank removal. No soil samples associated with the piping were collected because all piping was immediately above the tank and the two excavation bottom samples were thought to be adequate to characterize the distribution of potential contaminants.

3. *Chain-of-custody documentation initiated by person obtaining sample through person at Department of Health Services certified laboratory for all the samples that were not previously provided.*

Chain-of-custody documents which are available are attached to the corresponding analytical reports presented in Attachments A and B. After a rigorous search, some of the chain-of-custody documents pertaining to the confirmatory samples were not able to be located. Apparently, one field staff member who is no longer with the company did not follow appropriate chain-of-custody procedures for some of the samples that were collected. It is indicated on Tables 1 and 2 whether the chain-of-custody and/or the laboratory data sheet was available for each specific analysis.

4. *Analysis results by a State certified laboratory shall be submitted on laboratory letterhead showing analysis date, methods of extraction and methods of analysis for samples including from previous site assessments that were not submitted.*

Analytical data sheets for all confirmatory samples are presented in Attachment B. Tables 1 and 2 indicate whether these documents are available for each analysis.

5. *Explain why soil samples in the garage area was analyzed only for total petroleum hydrocarbons.*

The analytical results presented on Figure 3 are limited to TPH values. The site characterization indicated TPH was the only contaminant of concern in Areas 5, 6, 7, and 13. Attached in Table 1 are the results of the site characterization samples collected from these areas.

6. *Disposal destination and evidence of legal disposal of one tank and four sumps.*

Provided in Appendix A are the disposal manifests for all soil and demolition debris removed from areas 5, 6, 7, and 13 of the site. The removed vaults consisted of concrete debris and were among the material represented by the manifests. The 500 gallon UST was dismantled on site and shipped with the rest of the debris from the site.

7. *Manifests to document hazardous waste disposal of removed soil/tank rinsate with the signature of the disposal facility owner/operator.*

Rinsate was transported to Grassy Mountain Landfill in drums. The disposal documents for the rinsate are presented in Attachment C.

8. *Manifests to document hazardous waste disposal of removed soil/tank rinsate with the signature of the disposal facility owner/operator.*

All hazardous waste disposal manifests which pertain to the TPH soil removed from areas 5, 6, 7, and 13 are presented in Attachment C.

As noted, some of the requested information was, after an extensive search, unable to be located. Since the site remediation was completed, significant changes have occurred within USPCI, most notably that USPCI was purchased by Laidlaw Environmental Services. The purchase resulted in office closings, office consolidations and considerable personnel changes. Personnel involved in the remediation are no longer employed with USPCI/Laidlaw. During this transition period, the remediation records have been transferred accordingly. USPCI has made all conceivable attempts to locate the missing records. Files have been searched and former employees and the appropriate laboratory and disposal facilities have been contacted. Since the missing records have not been able to be located, USPCI/Laidlaw now believes these data are lost. In all likelihood, the documents were misplaced during the transfer of records from one facility to another.

USPCI/Laidlaw realizes the chain-of-custody records provide an important role in the information as support documentation for the final laboratory data. Even though some are missing, the critical laboratory analytical documents are available. Accordingly, USPCI/Laidlaw requests that the Department of Public Works accept the data without the supporting chain-of-custody documents.

Ms. Rani Iyer

The method of analysis for chlorinated hydrocarbons in soil is taken from E.P.A. Methods 3550 and 8120. The sample is extracted with repeated portions of methylene chloride using a horn-type sonicator. The extract is dried with sodium sulfate, evaporated and exchanged to hexane. Final detection is by gas chromatography using an electron capture detector.

The method of analysis for low boiling hydrocarbons is taken from E.P.A. Methods 8015, 8020 and 5030. The samples are examined using the purge and trap technique. Final detection is by gas chromatography using a flame ionization detector as well as a photoionization detector.

The results for total low boiling hydrocarbons are calculated as gasoline and include benzene, toluene, ethyl benzene and xylenes.

The method of analysis for total recoverable petroleum hydrocarbons in soil is taken from E.P.A. Methods 3550 and 418.1. The sample is extracted with repeated portions of 1,1,2-trichlorotrifluoroethane using a horn-type sonicator. The extract is dried with sodium sulfate, treated with silica gel to remove polar compounds, and examined by infrared spectroscopy.

AGREEMENT

Customer agrees to indemnify and save harmless United States Pollution Control, Inc. and employees, against any and all liabilities, obligations, claims, losses, and expenses, arising out of work hereunder, or (2) arising out of injuries (including death) suffered by employees of Customer or its sub-contractors (a) in the course of their employment, or work hereunder, due to the failure of Customer, or their sub-contractors, or anyone else who may be employed by them or any of them to act with due care while engaged in the performance of the work contemplated by this Agreement. Further, in connection with the work hereunder, Customer agrees to indemnify and save harmless USPCI and the owner of any real property upon which the work is to be performed, against any liability to sub-contractors or other third persons under the mechanics' liens or other applicable lien laws of the State in which the work is to be performed.

I have read and understand the terms of this Agreement and represent that I am authorized to sign same as agent of Customer.

CERTIFICATE OF NON-HAZARDOUS WASTEPURISTON WIREUNION PACIFIC CORP.

has contracted with United States Pollution Control, Inc., here called "Generator" for transportation, storage, treatment and disposal of the solid waste described below and Generator hereby certifies and warrants to Contractor that the solid waste to be so disposed of is not "hazardous waste" as that term is defined in Title 42 United States Code §6803, because said waste meets the following conditions:

- a) Said waste is exempt from regulation because it meets the provisions of Title 40 Code of Federal Regulations Part 261.4, and/or,
- b) Said waste is not listed as a hazardous waste in Subpart D of Title 40 Code of Federal Regulations Part 261 and said waste is not classified as a hazardous waste in Subpart C of Title 40 Code of Federal Regulations Part 261 as a result of actual testing or knowledge of the hazard characteristics of the waste in light of the materials or processes used.

CERTIFICATE OF NON-HAZARDOUS WASTE

Preston Wied

UNION PACIFIC CORP.

has contracted with United States Pollution Control, Inc., here called "Generator" for transportation, storage, treatment and disposal of the solid waste described below and Generator hereby certifies and warrants to Contractor that the solid waste to be so disposed of is not "hazardous waste" as that term is defined in Title 42 United States Code §6903, because said waste meets the following conditions:

- a) Said waste is exempt from regulation because it meets the provisions of Title 40 Code of Federal Regulations Subpart A, and/or,
- b) Said waste is not listed as a hazardous waste in Subpart D of Title 40 Code of Federal Regulations Part 261 and said waste is not classified as a hazardous waste in Subpart C of Title 40 Code of Federal Regulations Part 261 as a result of actual testing or knowledge of the hazard characteristics of the waste in light of the materials or processes used.

DESCRIPTION OF NON-HAZARDOUS WASTE:

CONTAMINATED SOIL + DEBRIS

ORIGIN OF WASTE:

REMANUFACTURE OF CEMENT

TYPICAL ANALYSIS OF WASTE:

Compound

CONCRETE
Asphalt
Dirt
Dust
TPH

CERTIFICATE OF NON-HAZARDOUS WASTEPENSTON WEEDUNION PACIFIC CORP.

has contracted with United States Pollution Control, Inc., here called "Generator" for transportation, storage, treatment and disposal of the solid waste described below and Generator hereby certifies and warrants to Contractor that the solid waste to be disposed of is not "hazardous waste" as that term is defined in Title 42 United States Code §6003, because said waste meets the following conditions:

- a) Said waste is exempt from regulation because it meets the provisions of Title 40 Code of Federal Regulations Part 261.4, and/or,
- b) Said waste is not listed as a hazardous waste in Subpart D of Title 40 Code of Federal Regulations Part 261 and said waste is not classified as a hazardous waste in Subpart C of Title 40 Code of Federal Regulations Part 261 as a result of actual testing or knowledge of the hazard characteristics of the waste in light of the materials or processes used.

CERTIFICATE OF NON-HAZARDOUS WASTE

PETITIONER CONTRACTOR, here called "Generator" has contracted with United States Pollution Control, Inc., here called "Contractor" for transportation, storage, treatment, and disposal of the solid waste described below. Generator hereby certifies and warrants to Contractor that the solid waste to be so disposed of is not "hazardous waste" as that term is defined in Title 42 United States Code §6003, because said waste meets the following conditions:

- a) Said waste is exempt from regulation because it meets the provisions of Title 40 Code of Federal Regulations Part 261.4, and/or,
- b) Said waste is not listed as a hazardous waste in Subpart D of Title 40 Code of Federal Regulations Part 261 and said waste is not classified as a hazardous waste in Subpart C of Title 40 Code of Federal Regulations Part 261 as a result of actual testing or knowledge of the hazard characteristics of the waste in light of the materials or processes used.

GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.
